

Prism v2.1 Release Notes

Features

- Added timecode control.
- Added timecode triggers for time-based media launching.
- Added network stream inputs.
- Added support for Blackmagic capture cards.
- Added support for multiple outputs.
- Added RTSP outputs.
- Added 3D model-based regions.
- Added media encoder presets.

Updates

- Improved application startup and launching user interface.
- Regions: added rotation and mirroring support.
- Synergy: updated the synergy previews (requires Titan v19.2).
- Updated NDI to v6.3.1.

Fixes:

- Player video playback gets garbled if you change graphics adaptor.
- Alpha blend mode result is too dark.
- Prism UI: The drop down to select the live input hides when moving the mouse over the drop down.
- Prism crashed after selecting a 1080P datapath input.
- Region Copy and paste doesn't obey selection order.
- Surfaces show as connected after disabling the Titan Media Node.
- Inputs: when switching from a source to another in Preview window error is prompted.
- Transparency Issue on Master.
- Stage Page - Undo Redo not working.
- Prism UI: trim panel on play bar not working.
- Prism crash on undo/redo.
- UI text input is not allowing to continue editing after paste.
- Unplugging display will not show correct results on the Prism UI.
- Preview window is not cleared on loading or creating a new project.
- Prism UI: output buffer is not cleared correctly
- Prism UI: Next/prev buttons on layers are disabled if media is not video.
- Prism UI: export bank not showing filename on dialog.
- Output Selection Mismatch between Regions and Outputs Pages.
- Region Controls No Source selected gives NaN control values.

- Prism UI, Play page: arrow on layer selection has different size and positioning.
- Relocate missing media doesn't work if the chosen directory is the same as original media directory.
- 'Relocate all in folder' popup is displayed any time you relocate media.
- Undo doesn't work properly when pasting text into most tag entry fields.
- UI grey-out/crash when re-adding multiple clips still being analysed to a project.
- Clicking on the playmode button for a newly created layer causes it to flicker open then close.
- Prism UI/ Play Page: double click on layer preview will collapse parent Surface.
- Prism UI/ bank grid view: after moving a bank element, the element will show red boarder.
- UI Logger will appear over multiple files in one instance.
- aspect mode - Window and Centre functionality are mixed up.
- Prism UI: Delete popup not working in certain cases - all areas.
- Prism UI can't be closed from taskbar.
- Prism UI: stage page showing wrong placeholder.
- Reordering bank elements in grid view is a bit finnickly.
- UI Not always storing the layout when closing with keep server running active.
- Prism UI doesn't remember that it was maximised when reopened.
- Canvas is sometimes garbled after reopening UI.
- Resume Playback at Start: Layer with a pause playmode will play at startup.
- Prism Player: aspect mode can't be changed.
- Adding element will push undo action over allowed max.
- Regions page not showing warning on missing source/destination.
- Prism UI: save project dialog window pointing to wrong default path.
- Triggering actions on the bank element will deactivate the bank.
- Layer selection interacts inconsistently with placeholders in Surfaces page.
- Attempting to add a json file as a bank element results in 'Could not import bank' warning.
- Importing corrupted region file will show wrong notification.
- Preview window minimized causing js error.
- Noticed console error FILE_NOT_FOUND on UI.
- Total permitted number of output elements doesn't follow physical limits.
- Element Renaming Issue in Encoder.
- Duplicating multiple elements producing duplicated tags.
- Fullscreen UI shows before the splash screen.
- Virtual Return not working with Surfaces.
- Importing Encodelist via dropzone.
- Virtual Returns will override user-defined tags if the source is changed.
- Media Manager doesn't correctly identify clips added via Titan's Media Browser.
- New layers added through Synergy don't have a tag.
- Encode List name entries can duplicate filetype suffixes.
- Prism Encoder: mkv file failing to transcode.

- Prism UI: Importing or dragging files to UI will corrupt the undo stack (Regions and Encode List).
- Prism UI: playmode control not closing after selection.
- Layers: Launching on multi selection will set the Player Controls to default.
- Prism UI: Disable dragging when a menu is open
- Prism UI: UI will blank out on reordering encode list elements
- Noticeable delay when triggering clips using some non-AiM codec types.
- Dropzone issue: dragging folders stopped working.
- Seeking on the playbar is not working correctly when media is paused or stopped.
- Transformation Accordion created an extra scrollbar x axis.
- Prism UI: lock on Preview Window resolution not keeping its state.
- Layers: launching on multi selection will set Player controls.
- Prism UI: layer's control not opening on selecting a layer.
- Crop Media adjustments jitter around.
- Selection highlighting seems to lag when deselecting media elements with ctrl-click outside of the tick box.
- Clicking on a media element in a bank does not clear current selection.
- 'Select All' checkbox for layers on Surfaces page doesn't deselect automatically if surface is empty.
- Surface resolution is not updated correctly.
- Prism UI: surface buffer will freeze with resolution height is small.
- Prism UI: duplicate and delete buttons have different sizes across similar headers
- Prism UI / Synergy: play mode not showing up if out of the range
- Next and prev are not disabled after clear layer.
- Resolution Control Issue when setting a value more than once.
- Clear media and retrigger buttons are a bit smaller in the Preview window than layer controls.
- Prism UI: preview will not work at start.
- Preview width/height aren't reset when starting a new project.
- Monitor output gets stuck when changing graphics card.
- There is a single-pixel vertical line in the element source selection popup.
- The Play screen flickers when you try to re-open it.
- Surfaces page: undo will not retain surface resolution.
- Prism and Prism Player do not open unless you've installed 2.0 before them.
- Preview Window canvas is frozen / does not work when opening.
- Closing main window from taskbar will show javascript UI error.
- Prism can't play Rawvideo uyvy422.
- Prism not being discovered by Synergy Settings.
- Corrupted config files can stop the Prism UI from starting.
- Undo / Redo on UI input boxes - issues on paste.
- Prism UI: bank and bank element on layer preview will not clear on clearing the layer.

- Pasting text into number input causes error.
- Cross fade on layer will not start or update properly while layer is not rendering.
- Blackmagic HDMI live input is flipped, and colour space is not correct.
